PROFILE

Developed my skills as a Front-End Developer at an e-commerce website, gaining valuable experience with Vue.js and JavaScript over the past 2 years. Actively participated in updating older projects to new technologies and successfully translated design concepts into functional code. Contributed to improving the user experience by providing my comments on the design of some projects. Outside of work, Organize weekly board game nights, honing my strategic thinking and collaboration abilities.

EMPLOYMENT HISTORY

Dec 2023 — Present

Freelance Frontend Developer, Tellpal
Rotterdam, Netherlands

- Tellpal is an application where children can listen to stories through a mobile app.
- Created a website based on the provided designs to promote the application, resulting in an increase of up to 20% in the download rate of the app.
- Additionally, I supported the creation of a user-friendly website by sharing my experiences in design.

Jan 2022 — Jul 2023

Frontend Developer, Beymen Group
İstanbul, Turkey

- Created from scratch an employee performance evaluation project in the Beymen Group to improve operational efficiency.
- With this project, the performances of almost 50 developers working in the company began to be monitored through the website instead of Excel.
- Played a key role in the development of the Beymen e-commerce website, focusing on improvements in the cart, order, and payment functionalities, which resulted in a 15% increase in overall checkout completion rates in one year.
- Migrated the given designs to the project using Figma and Zeplin.
- Took part in migrating projects written with Jquery to Vue2.
- Reviewed code, debugged problems and corrected issues.
- Estimated work hours and tracked progress using Scrum methodology.

Jul 2021 — Dec 2021

Software Engineer Intern, Onftech Software Solutions
İstanbul, Turkey

- Contributed to a Human Resources project developed from scratch using React and TypeScript, resulting in a 10% decrease in processing time for HR tasks.
- Written backend code in C# and prepared SQL queries as needed.
